Stevenson, of Graham, committed suicide, it is supposed, because her sweetheart failed to keep his promises to her, and was to marry another girl. The young lady went to a drugstore, pur-chased an ounce bottle of carbolic acid, went to her sister's home, where she was to spend the night, retired, got up, left to spend the hight, retried, got up, the house, was gone about one hour, came back, and drank the poison. Her sister became alarmed at peculiar noises she was making, and called a doctor, but too late. The unfortunate young lady too late. The unfortunate young lady left a letter stating that she cared to live no longer. She told her sister where to bury her, and to put one of her sweetheart's pictures in her coffin. She pinned the letter in her hat, where

REPORTS FROM ALL GREAT BUSI-NESS CENTRES OF THE WORLD.

Prices of Money, Bonds, Stocks Grain, Tobacco, Cotton, Cattle Country Produce, &c., Foreign and Domestie.

NEW YORK, September 30 .- There was no sign of anything in to-day's stock market to give encouragement to the of the dealings did not differ in any respect from those of yesterday. Prices were raided down with great facility, and the declines invited large offerings. The slight rallies which occurred a few times, on the contrary, led to an almost total cessation of activity, and the upward course of prices was halting and difficult. The net decline achieved today is very much greater than that of yesterday, only because the bears re served their greatest efforts for the last half hour of trading, leaving no opportunity for recovery before the close. This was apparently owing to an excess of confidence on the part of the bears who were content to leave their short contracts uncovered overnight instead of realizing immediately.

The market continued almost wholly professional, and the dealings seemed to professional, and the dealings seemed to be confined to the room traders, except where the sharp declines uncovered or-ders placed to stop losses. These were in large volume, and alded materially in the decline. A feature of the day was the reversal of the positions of opera-tors for the London account, who were sellers to-day. London prices also came lower, and this was said to be due to a resumption of the selling there for New York account, which was so persistently adhered to up to a short time since. The statement of earnings of Burlington for August had been expected to check the decline in prices, but favorable as it was decline in prices, but favorable as it was, it had not only been fairly discounted, but exaggerated reports of the extent of the improvement had been put in circulation for their effect on speculation. The actual result, showing an increase in net earnings for the month of \$344,276, is ample indication of the enormously increased traffic which is being handled by the railroads. Weekly earnings to hand the railroads. Weekly earnings to hand for the third week of the current month were equally encouraging, the improvement extending even to some of the soft coal roads, which have long suffered from the depressing conditions in that

The resignation of the Spanish Ministry and the prospects of a Liberal govern-ment in Spain were accepted as tending to ameliorate the relations between that country and the United States, and the news that conciliatory proposals from the Cuban insurgents had been received the deprive the at Madrid also tended to deprive bolters of their pet weapon, the Cuban question. A decline in sterling exchange of 1-2 per cent, in posted rates and 1-4 per cent, in actual rates brought the price appreciably nearer to the gold import point, and was a favoring factor to an point, and was a favoring factor to an increase in prices, as well as a slightly easier tone in the money market.

The bears forced a decline, in spite of all these conditions, and made especially fierce raids on special stocks.

The values of railways

The values of railway mortgages held firm against the decline in stocks, on re-

firm against the deside in soles, duced dealings. The total sales reported were only \$1,225,000.

Government bonds strong. State bonds dull. Railway bonds firm. FOREIGN STOCK MARKETS. The Evening Post's London financial cablegram says: The stock markets here were good to-day, except as to Americans, which followed the New York lead and closed at about the lowest. It is not likely that there will be any strong renewal of buying of Americans here until the New York position has been more clearly defined. It is still believed, howelearly defined. It is still believed, how-ever, that New York will soon start an

upward movement again, as the inactivity there is increasingly discredited here.

Mines were good, and the papers talk of a transference of attention from Americans to them. That, however, practically depends on the New York initiative. South Americans were in favor, notably Argentines and Brazils.

Short time loans are in demand here, as is usual on the last day of the month, and the bank ient a considerable amount to-day.

CONJECUS OF THE COMPANY —The chief object of the company is to carry on a general trade.

OBJECTS OF THE COMPANY .- The chief object of the company is to carry on a general trade in and to develop the gold fields of British America and Alaska, including especially the Klondike district, and other equally rich but hitherto undeveloped placer and quartz regions at the head waters of the Yukon river, about which the company has reliable information from returned explorers and from members of Government Surveys of Canada and the United States

While other companies are trying to buy or locate claims in the gold regions this company has bought the entire property of Mr. A. E. Ironmonger Sola, of Dawson City, consisting of ten mixing claims, under new regulations, and on which a force of men is now at work taking out gold. On one of these claims a prospect shaft has been sunk to within five feet of supposed bed rock, and out of which gold was taken at an average of \$1.25 per pan, actual gold, and by the use of no better method than the common sluice-box. These claims are 100 feet up and down the creek and running back to the mountain common stude-box. These claims are 100 feet up and down and creek and running back to the mountain or rim rock on an average of from 200 to 1,500 feet. The pay gravel or detritus is to a depth of about 20 feet to bed rock. We do not undertake to say how much gold any one of these claims will produce, but when you figure that a pan produces, say \$1.25, and there being 120 pans to the cubic yard of earth, and a claim being 100 feet long by say 1,000 wide and 20 feet deep, the result is so great that it seems fabulous. Yet it is a fact that some pans have produced as much as \$500 or \$600, and it is no uncommon thing to get as much as \$10 to \$20, but even at the very conservative result of \$1.25 per pan, when it is understood that this company owns ten claims on Bonanza and Last Chance creeks, right in the heart of the Klondike, it is not unreasonable to expect great fortunes to be taken from these claims; and, besides, the Company are now arranging to send a number of small prospecting parties to the Klondike regions the company are now arranging to send a number of small prospecting parties to the Klondike regions in the early spring to continue prospecting and locating new claims, and during that time to do a general trading business, out of which the company expect to make great profits.

The personnel of the Board of Directors and the officers is such as to warrant beyond question pru-

dent yet energetic management, which will assure the marked success of the company's business. All of the gentlemen interested have been, and are, prominent and successful in the largest affairs in the country; have such financial, mining, and commercial experience, and possess such a practical knowledge of buying and selling, of trading and pioneer work; the ability to select and appoint as managers and agents the most competent and responsible men for the various posts, and by influence and connection, so close a touch with the largest amount of active capital at home and abroad as to justify the fullest confidence.

(Pittsburg Chronicle-Telegraph.)
"The lady you allude to in your conversation as the Princess," remarked one traveller to another on board a train, "is your daughter, I presume?"

"Yes."
"She is married to a Continental prince, perhaps?"
"Not at all. My daughter is 4 years old, and, therefore, not married. She is a princess in her own right. Her full title is the Princess of Walls."
